Bruno Martins is an Assistant Professor at the Computer Science and Engineering Department of IST (University of Lisbon), and a researcher at the Information and Decision Support Systems (IDSS) lab of INESC-ID, where he works on problems related to the general areas of information retrieval, text mining, and the geographical information sciences. He has been involved in several research projects related to geospatial aspects in information access and retrieval (e.g., problems related to geographical text analysis in application areas such as the digital humanities or the computational social sciences), and he has accumulated a significant expertise in addressing challenges at the intersection of information retrieval and the geographical information sciences (i.e., in an area that is often referred to as geographical information retrieval).
