

UCSB's Interdisciplinary Research Centers, NOVIM, and Cottage Health invite you to a seminar series on:

Issues, Approaches, and Consequences of the COVID-19 Crisis

UCSB Faculty members and experts from the Santa Barbara community will offer lecture/discussion sessions on a variety of facets and insights into the COVID-19 pandemic, and its implications across a range of areas.

We encourage faculty, staff, students, and community members to attend.

Sessions will convene Tuesdays from 1 to 2 p.m. via Zoom webinar system.

Click [here](#) to get the Zoom software and use Webinar ID 644-027-449, or use <https://ucsb.zoom.us/j/644027449> to join in.

Individual speakers from a variety of disciplines will address these topics on the following dates:

April 14: SARS-CoV2: The Virus and the Disease

April 21: Current Epidemiological Models: Scientific Basis and Evaluation

April 28: Coping with Heterogeneity and Uncertainty of COV-19 Datasets

May 5: From Epidemiological Models to Making Decisions about Epidemic Control

May 12, 19, 26, and June 2 and 9: TBD

The last five weeks will consider historical aspects and lessons from similar epidemics, social and psychological aspects, ethics, economic impacts, and Artificial Intelligence/Machine Learning models and interventions.

Please join us for an exciting seminar series.
