Department of Geography
Director, Center for Spatial Studies
University of California at Santa Barbara

Twitter hashtag (#local2014)
Our annual specialist meetings bring experts from academia and industry together to discuss a specific topic in depth. The proceedings of each event, including presentations and position papers, are available online.

Advancing the Spatially Enabled Smart Campus

December 11–12, 2013

“Advancing the Spatially Enabled Smart Campus”

This two-day meeting engaged academic and industry representatives with interest in conceiving, designing, and building a smart campus in a discussion of the Smart Campus.

Some questions remaining to be asked

1. What makes us **smart**?
   - tools, policies, networks, perspective taking, coopetition, laziness…

2. What **tasks** to facilitate?
   - it should be easier for x to do/find y

3. What are specific **privacy** (and other ethical and legal) concerns?
   - and what methods can we devise to address them?

4. Do we do enough campus “land **use** mapping”?
   - and connect it “outside the polygon”?

5. Are the **differences** to smart cities more interesting than the similarities?

Can we lift spatial to new levels?

Beyond smartly facilitating what we do, can we do different things?

Two examples from this campus …
Imagining Your Library

We do not view this project as simply a renovation, but rather as a re-conceptualization of what a library can and should become. We want to hear from you - our students, faculty, and staff - about the role the library can serve to advance your academic needs. This is your chance to shape the future.

Rendering of 24-Hour Information Commons

These are some of the spaces we intend to gather feedback from users about:

- 24-Hour Information Commons
- Special Collections Seminar Room
- Faculty Collaboration Studio
- Instruction Labs
- Group Study Rooms
Experiencing sustainability
Thank you!
